-Instructions & more on the reverse-

Instructions on completing this report:

1. List the service(s) that you provided.
2. The park is "incidental" if your services originate and terminate outside the park boundary (e.g. no advertisement, soliciting of business, negotiation or acceptance of any form of compensation takes place in the park).
3. Please show the percentage of the service for which you were authorized took place in the park for the season. For example if you are an Air Taxi servicing areas in- and outside of the park, show the percentage of time you provide this service in the park. If the park is the only area that you service, show 100%.
4. Refer to the service(s) for which you were permitted. Please show any amount you grossed from providing that particular service in the park. E.g. Kayakers Haven, a worldwide business, is permitted to provide kayak tours in the park. They charge a single amount for the tour package that starts outside the park but eventually encompasses an area in the park. To answer question number 4, they would show revenue applicable to that portion of their trip that took place in the park. This would likely be calculated by applying the percentage identified in question #3 above to the total gross receipts for the trip.

Gross revenue is defined as: The total amount received, realized by or accrued to the business operator for all sales of goods and services provided by the business operator for payment by cash, barter, or credit pursuant to the privileges granted by the permit.
- 5 Due to the variety of businesses and services being provided, the NPS does not specify a method for figuring your gross. Instead, briefly describe the method that was appropriate for your business.

Please show amount grossed for each park in which you operated.
